	Darker contrast
	Lighter contrast
	Restore default contrast
	Edit value
	Increment value
	Decrement value
	Decrement through character list (String edit)
	Increment through character list (String edit)

PLEASE READ THE MANUAL ON THE CD-ROM FOR FULL INSTRUCTIONS ON THE USE OF SPRINT V2. THIS GUIDE CAN THEN BE USED FOR QUICK REFERENCE.

Important: please connect flue probe first before switching on your Sprint unit, ensure the water trap is empty and is fitted in the right direction. Do not insert probe in flue till after auto zero. Always start in clean air.

SWITCH-ON

Press and hold the ON/OFF/ENTER key for two seconds until you hear a beep. Ensure the gas exhaust outlet is not blocked. Allow unit to stabilise after warm-up is finished. Press the proceed

key to complete auto zero. After a successful auto zero, Sprint will display the *Test* menu screen and switch off the pump. You can enter the *Main* menu at any time and make further changes to the options by pressing the ESC button from the *Test* menu.

SWITCH-OFF

Press and hold the ON/OFF/ENTER button for approximately two seconds until you hear a rising beep. Press the ESC key to stop switch off sequence.

PERFORMING TESTS

To enter any test screen, select the required test from the menu and use the soft key marked .

To end any test, press the ESC key.

FLUE GAS ANALYSIS

Select *Flue gas analysis* from the *Test* menu. Sprint will switch on the pump and begin making measurements. Use the soft keys to log or print the results.

Press the ON/OFF/ENTER button to display the three screens available:

- Screen 1: CO, CO₂, CO/CO₂ ratio and pressure.
- Screen 2: O₂, XSair, temperature and efficiency.
- Screen 3: Combines both screen 1 and screen 2.

To perform a manual pressure zero, use the soft key marked .

PRESSURE AND DIFFERENTIAL PRESSURE TESTS

Before carrying out the test, the pressure must be zeroed with the tubes connected to the instrument but not to the pressure source. A thermocouple may be connected to provide temperature readings in these tests.

1. Select *Pressure Menu* from the *Test* menu. From the *Press* menu select *Pressure* or *Diff Pressure*.

2. Connect tubes to pressure inlets.

3. Zero pressure, use the soft key marked .

4. Connect tube(s) to pressure source(s) to begin differential pressure tests. Sprint will give a warning if the pressure points are the wrong way round.

5. There is an option to time this test: Sprint displays the duration time on the screen.

Press the soft key to start optional timer.

6. To stop timer press the soft key .

7. To restart timer press the soft key then .

To re-zero the unit, press .

Press the ESC key to return to the *Press* menu screen. To perform the Differential Pressure test repeat steps 2 to 7 above.
